FAQ

- 1. If you're experiencing interrupted or slow charging, check the following:**
(1) The back of your phone should not have any metal, pop sockets, or credit cards.
(2) Put the phone in the center of the charging surface (this lets the charging coil in your phone lineup with the one inside the wireless charger).
(3) The wireless charging coil on Sony phones is located slightly below center.
(4) Phone cases should be no thicker than 5 mm for effective charging.
(5) Check whether the adapter is QC3.0 fast charger.
- 2. If you're failing to charge your device, please try out the following:**
(1) Please restart your cell phone and test with other USB cable.
(2) Please check whether the indicator turns on or not.
(3) The wireless charging coil on Sony phones is located slightly below center.
(4) Phone cases should be no thicker than 5 mm for effective charging.
(5) Check whether the adapter is QC3.0 fast charger.

- 3. If you're using the recommended wireless charger with the QC3.0 Adapter and have removed any potential charging obstructions, but are still experiencing issues, try this:**
(1) Replacing the cable connecting your wireless charger.
(2) Rebooting your phone.
(3) Unplug the adapter and reinsert.

4. Charging is still slow.
The mobile phone itself or the external receiving coil allows the wireless charging current to be different, or the application running consumes a lot of power when the mobile phone is charging. It is recommended to reduce or close the application.

5. The phone is charging intermittently, or the indicator light flashes.
If the charging current is not enough, please use a adapter with sufficient power 9V/2A or 18W above.

6. Charging fever.
It is normal for the receiving coil or transmitter board to generate heat during wireless charging. If the wireless charger is too hot, please take your phone off it, when the wireless charger is cooled down, please charge it again.

7. The charger does not work.
Do not put metal debris or magnetic cards on the charging area. If the product does not work due to overheating, please take off the phone and charge it again when it is cooled down.

WARNING

- 1. Avoid using the product at places that are wet, humid or have high temperature.
- 2. Avoid dropping the product from high places.
- 3. Do not disassemble the product by yourselves. Please contact us if necessary.
- 4. Do not clean the product unless the unit is powered off.
- 5. It is recommended to use 18W or above adapter to charge 3 smart devices at the same time.

PRODUCT INTRODUCTION

The 3 in 1 Wireless Charger is a multi function charging station. You can charge three smart devices (Qi smart phone, Galaxy watch and earbuds) on our product at the same time. It is compatible with Qi-enabled smart phone, Galaxy watch, Buds and most TWS earbuds.

The charger is uniquely designed with an elegant appearance, which makes it perfect for use at home and office. It's quite convenient to charge smart devices on it, especially for Samsung users. With multiple safety functions including over-charge protection and FOD function, you can enjoy safe charging all the time.
